In-clinic

MICRONEEDLING WITH DERMAPEN 4™

Using the world's most trusted microneedling device, your skincare specialist will prescribe a Dermapen Treatment™ plan. Microneedling is a skin renewal procedure that's clinically proven to simulate the body's repair process to produce collagen and elastin to improve the appearance of skin. The technique creates micro-channels, which is a powerful way to deliver healing nutrients to correct your skin.

MG-CLR™

A specially formulated Meso-Glide™ serum, which carries actives—a potent combination of antimicrobial peptides and bio-compatible extracts deep into the skin. Designed to clear and improve the appearance of acne, blackheads and oily skin.

ÜBER PRO™ PEEL

Your skincare specialist may recommend a treatment upgrade as part of your microneedling. ÜBER PRO contains a special blend of treatment actives to increase cellular turnover while addressing your acne. Unlike other chemical peels, ÜBER PRO is safe to use on any skin colour.
